

PART 8.0

ENLARGED COMMENTS SECTION ON ADDRESS SCREENS

8.1 Enlarged Comments Section

States requested that the IRG display a larger Comments section on all address screens. This will allow states the ability to provide a detailed address type and defined area of responsibility. The Public users can view information in the Comments section on the address screens (refer to figure 8-1 Comments window – public View).

8.2 Enlarged Comments Section – View Only

To view an address, click the **State**, **Region** or **County** button to display the “View [State, Region, or County] Address Data (Read-only)” screen (please refer to the *Online IRG User Guide* for information about viewing state, region or county addresses).

1. If comments exist, characters will display in the Comments text box. The **More ...** button is enabled if there are more comments.
2. Click the **More...**button (if applicable). A window will appear displaying the entire comment text.
3. Click the **Cancel** button when you have completed viewing the comments.

Note: If there are no comments, the **More ...** button is disabled.
